AGGRESSIVE COMMAND
SUPPORTS AGGRESSIVE FIREFIGHTING

The Aggressive Command System is designed to organize the incident early, support rapid deployment, and maintain accountability without slowing operations. The Command Simulations put that framework into practice through realistic, evolving scenarios.

COMMAND SIMULATIONS TRAINING

IN PERSON

REAL-WORLD APPLICATION TO STRENGTHEN STRATEGIC DECISION-MAKING AND BUILD CONFIDENCE IN COMMAND

Simulations prerequisite:
RECOMMENDED:
Full Aggressive Command Academy
Alternatively at a MINIMUM:
1-Day In-Person Seminar

What You'll Train On

This hands-on training is designed as a follow-up after learning the Aggressive Command System, and is best taken after completing the Aggressive Command Academy (10–12 Week Online Program: Self-Paced or Cohort-Based).

The simulations training day(s) focuses on real-world application, giving participants the opportunity to apply the system under realistic conditions through multiple fireground simulations.

Students gain practical experience applying strategic and tactical decision-making models—along with their department's operations—to a variety of incident types and scenarios, including:

- **single and multi-family**
- **commercial buildings**
- **mid-rise buildings**
- **custom buildings + hazards unique to your area**
- **defensive-transiton and MAYDAY management**

COMMAND SIMULATIONS TRAINING

COMBAT READY FIRE TRAINING

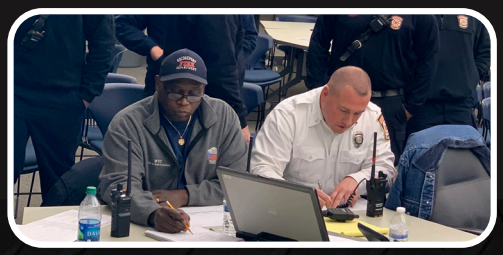
How it Works

Participants operate within non-scripted, realistic scenarios that replicate the progression of actual incidents. **Each simulation:**

- Evolves in real time based on the Incident Commander's decisions
- Reflects your department's staffing, SOGs, and operations
- Follows the full lifecycle of an incident—from dispatch to control
- Uses multi-angle, multimedia views (interior & exterior) to create realism and reinforce command practices.

RECOMMENDED PREPARATION:
AGGRESSIVE COMMAND ACADEMY
10-12 WEEK ONLINE PROGRAM
LEARN MORE

OR AT A MINIMUM, STUDENTS NEED TO BE PRESENT FOR 1 FULL AGGRESSIVE COMMAND CLASSROOM DAY.



Class Format

- **Approximately 8 scenarios per day**
- **Up to 8-10 participants serve as IC**
- **Other participants fill company officer and other command roles**
- **Typical class size: 15 to 30**
- **Each scenario simulates a full response, including multiple alarm scenarios**

Incident Commanders have the opportunity to safely evaluate and refine both new and current command approaches. This training also allows company officers to actively participate, building experience while strengthening coordination and understanding across the command structure.

Participants rotate through **KEY ROLES**, including:

- Incident Commander
- Command Aide
- Division/Group Supervisors
- Company Officers

RESULTS

Participants gain real-time decision-making experience, build confidence in command, and develop a clear understanding of how to apply the system on the fireground.

Departments that implement the full Aggressive Command System will have a repeatable way to apply, evaluate, and refine command performance using their own staffing, communications, and operational procedures - building consistency, reinforcing habits, and supporting long-term development.

FAILURE IS NOT AN OPTION — COMBAT READY FIRE TRAINING
