TOP 5 COMMANDments OF A SAFE AND EFFECTIVE FIREGROUND

COMBAT READY FIRE TRAINING

The 5 Commandments of Aggressive Command

is a 1-day, in-person seminar focused on the mindset, principles, and command performance factors that influence fireground outcomes. This overview program examines how incidents are managed in real time and the role command plays in both successful operations and line-of-duty deaths.

This 1-DAY SEMINAR introduces the core principles of *The Aggressive Command System*

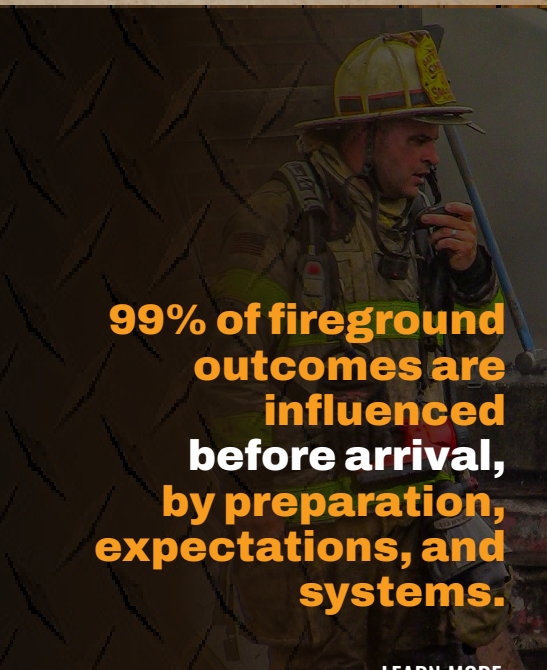
We cover the following and more:

- **Key contributing factors in firefighter line-of-duty deaths**
- **The "NIOSH Top 5" causes of LODDs**
- **Core principles of the full command system**
- **How command performance impacts safety, organization, and outcomes**

This seminar is designed for individual officers and firefighters looking to strengthen their understanding of command and improve their performance on the fireground.

It provides a clear, practical introduction to the system and establishes a strong foundation for applying the concepts in real-world operations.

For individuals and departments looking to go further, this training can be **expanded** into a **complete, structured command system** through additional programs and implementation. ↓



99% of fireground outcomes are influenced before arrival, by preparation, expectations, and systems.

About The Aggressive Command System

The Aggressive Command System is a structured, repeatable, and scalable approach to incident management, delivered in a practical and streetsmart manner that makes sense to the modern fire service officer. It is built to work in any department, from single-station volunteer to large metropolitan agencies, offering a practical and accessible system that does not rely on extensive time, staffing, or training resources to implement.
